

A soccer goal is set up on a green grass field under a dramatic, cloudy sky. A goalkeeper in a green and black patterned jersey is lying on the grass in front of the goal, holding a soccer ball. A striker in an orange jersey is in mid-air, having just kicked the ball into the goal. The goal is made of white poles and a black net.

Flexible multi-goal setup

Ideal solution for coaches

Full size and portable

FROM BAG TO GOAL

The world's most innovative approach to football goal design

Portable • Durable • Safe Keeping football on the move, anywhere, anytime

From Bag to Goal

The iGoal offers a unique solution to many of the problems coaches face

- No goals available because council hasn't put them up yet?
- Need to have a flexible multi goal set up, easily moved for camp, clinic, pre-season, trials?
- Not enough goals available to run the session you've planned?
- Trying to keep the goal mouth in good order?
- Full size portable goals on wheels too cumbersome to put in place for just one session?
- PVC goals deteriorating because they live outside?
- Haven't had full size portable goals because you have no storage for them and no security?

FEATURES

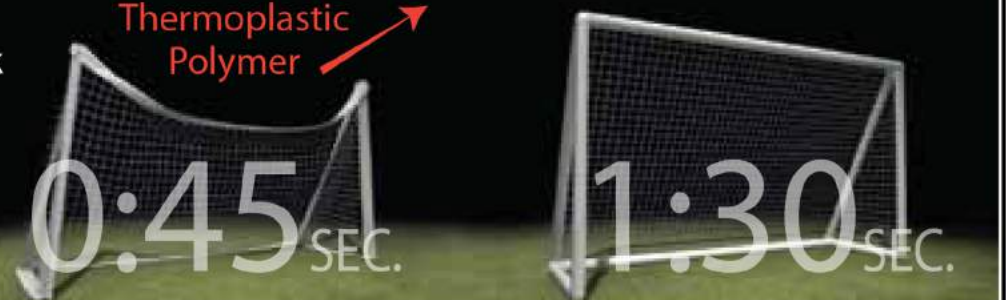

Unique Rigid Air Technology

iGoal is inflated to a maximum pressure of 1 Bar (15lbs psi) with the frame developed using a three-layer hose. At this pressure when a football hits the frame it reacts as a normal soccer goal. Yet, the material is flexible enough to significantly reduce the risk of injury due to collision with the goal.
